USE OF NON-GAAP FINANCIAL INFORMATION

Symbotic reports its financial results in accordance with Generally Accepted Accounting Principles in the United States ("U.S. GAAP"). This press release contains financial measures that are not recognized under U.S. GAAP ("non-GAAP financial measures"), including adjusted EBITDA, adjusted gross profit, adjusted gross profit margin, adjusted research and development expenses, adjusted selling, general, and administrative expenses, and free cash flow. These non-GAAP financial measures have limitations as an analytical tool as they do not have a standardized meaning prescribed by U.S. GAAP. The non-GAAP financial measures Symbotic uses may not be the same non-GAAP financial measures, and may not be calculated in the same manner, as

that of other companies and, therefore, are unlikely to be comparable to similar measures presented by other companies. Rather, these non-GAAP financial measures are provided as a supplement to corresponding U.S. GAAP measures to provide additional information regarding the results of operations from management's perspective. Accordingly, non-GAAP financial measures should not be considered a substitute for, in isolation from, or superior to, the financial information prepared and presented in accordance with U.S. GAAP. All non-GAAP financial measures presented in this press release are reconciled to their closest reported U.S. GAAP financial measures. Symbotic recommends that investors review the reconciliation of these non-GAAP financial measures to the most directly comparable GAAP financial measures provided in the financial statement tables included below in this press release, and not rely on any single financial measure to evaluate its business.

Symbotic defines adjusted EBITDA, a non-GAAP financial measure, as GAAP net income (loss) excluding the following items: interest income; income taxes; depreciation and amortization of tangible and intangible assets; stock-based compensation; business combination transaction expenses; equity method investment; internal control remediation; business transformation costs; fair value adjustments on strategic investments; restructuring charges; and other infrequent items that may arise from time to time. Symbotic defines adjusted gross profit, a non-GAAP financial measure, as GAAP gross profit excluding the following items: depreciation, stock-based compensation, and restructuring charges. Symbotic defines adjusted gross profit margin, a non-GAAP financial measure, as adjusted gross profit divided by total revenue. Symbotic defines adjusted research and development expenses, a non-GAAP financial measure, as GAAP research and development expenses excluding the following items: depreciation and amortization of tangible and intangible assets and stock-based compensation. Symbotic defines adjusted selling, general, and administrative expenses, a non-GAAP financial measure, as GAAP selling, general, and administrative expenses excluding the following items: depreciation and amortization of tangible and intangible assets; stock-based compensation; business combination transaction expenses; internal control remediation; business transformation costs; and other infrequent items that may arise from time to time. Symbotic defines free cash flow, a non-GAAP financial measure, as net cash provided by or used in operating activities less purchases of property and equipment and capitalization of internal use software development costs. In addition to Symbotic's financial results determined in accordance with U.S. GAAP, Symbotic believes that adjusted EBITDA, adjusted gross profit, adjusted gross profit margin, adjusted research and development expenses, adjusted selling, general, and administrative expenses, and free cash flow non-GAAP financial measures, are useful in evaluating the performance of Symbotic's business because they highlight trends in its core business.

¹ Adjusted EBITDA (earnings before interest, taxes, depreciation, and amortization) is a non-GAAP financial measure as defined below under “Use of Non-GAAP Financial Information.” See the tables below for reconciliations to net income (loss), the most comparable GAAP measure.

² Symbotic is not providing guidance for net income (loss), which is the most comparable GAAP financial measure to adjusted EBITDA, because information reconciling forward-looking adjusted EBITDA to net income (loss) is unavailable to it without unreasonable effort. Symbotic is not able to provide reconciliations of adjusted EBITDA to GAAP financial measures because certain items required for such reconciliations are outside of Symbotic’s control and/or cannot be reasonably predicted, such as the provision for stock-based compensation.

³ Amounts for the nine months ended June 28, 2025 have been revised to reflect the reclassification of \$58.2 million of cash flows related to the ASR acquisition from investing activities to operating activities.
